

# ASIAN KERBSTONE

## Half-Battered/Bull Nosed Kerbstone

Half battered & bull-nosed Kerb Stones are the most popular variety of kerb stones in Nepal and as well as around the world. They are extremely cost-effective and specially designed to save vehicles from grazing themselves against the edge of a pavement or carriageway. The kerb stones have a sloping back profile which provides this protection. Their inherent shape also allows road rollers to operate right against the edge of pavements without damaging the kerb surface.

### WHERE TO BE USED:

Roadways | Pathways | Bordering Pathways |  
Bordering Steps | Bordering Flowerbeds

### COLOUR RANGE:

Grey

Customized

### LAYING PATTERNS

### SPECIAL FEATURES

- High dimensional accuracy
