

ASIAN PERMEABLE TILES

Porous. Reliable. Versatile.

Asian Permeable Tiles are a versatile paving solution extensively utilized in landscaping and construction ventures. Crafted with a focus on permeability, these tiles facilitate water infiltration through their surface, directing it into the ground rather than contributing to stormwater runoff or erosion. This design feature not only helps manage water effectively but also promotes sustainable land use practices, making them an environmentally friendly choice for outdoor projects

WHERE TO BE USED:

Sidewalks | Walkways | Parks | Patios

COLOUR RANGE:

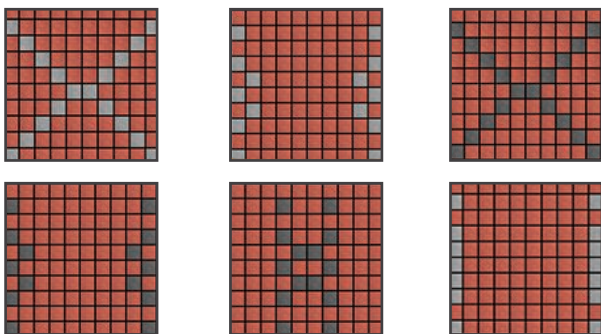

LOAD FACTOR:

SPECIFICATIONS

Dimensions (mm) (Length x Breadth x Thickness)	Tiles/m ²	Tiles/ft ²	Compressive Strength (MPa)
400 x 400 x 40	6.25	0.58	≥35
400 x 400 x 60	6.25	0.58	≥35

LAYING PATTERNS

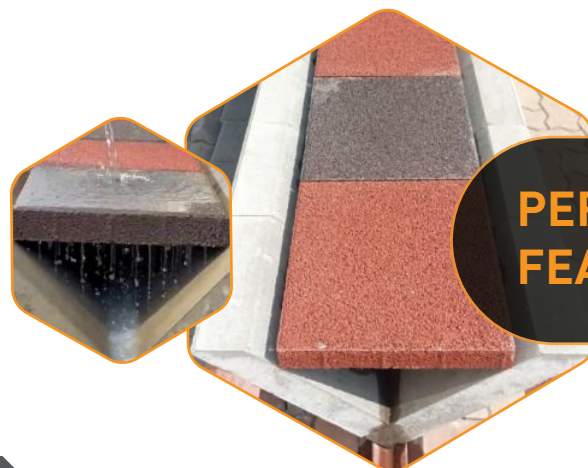

SPECIAL FEATURES

- **Porosity:** Asian permeable tiles are made with porous materials that allow water to infiltrate.
- **Paver Patterns:** Asian permeable tiles are designed to maximize surface permeability while maintaining structural integrity.
- **Surface Texture:** The surface texture of Asian permeable tiles helps to improve traction for pedestrians.

ADVANTAGES

- Cost-effective, less time-consuming
- Water Ground Recharge

**PERMEABILITY
